Notice of Data Breach

Dear:

We are writing to let you know about an incident that involved your personal information.

What Happened

Sandhills Medical Foundation, Inc., contracts with a vendor for online data storage. On January 8, 2021, the vendor notified Sandhills that hackers accessed their system and took Sandhills' data on or before December 3, 2020. According to the vendor's investigation, the hackers connected to their system on September 23, 2020 and could have accessed Sandhills' data as early as November 15, 2020. The vendor paid a ransom and the hackers returned the data. The hackers told the vendor they deleted the data and did not keep any copies. The vendor's cybersecurity experts monitored the internet and did not find any evidence that the hackers attempted to sell the data.

What Information Was Involved

Sandhills determined that patient medical records, lab results, medications, credit card numbers, and bank account numbers were **NOT** affected. The affected data included demographic information, such as names, dates of birth, mailing and email addresses, driver's licenses and state identification cards, and Social Security numbers. It also included claims information which could be used to determine diagnoses/conditions.

What We Are Doing

The vendor reported this incident to law enforcement and worked with cybersecurity experts to address, contain and recover from this incident. The vendor reported that it strengthened its security measures. As described below, Sandhills is also offering you free identity theft protection services.
